

# OFFICERS PURSUE BRIDGE BURNERS

## EDUCATORS RATE ADA COLLEGE AS LEADER OF KIND

University Graduates of State Say E. Central is Great Factor.

### EXTENSION STRESSED

Scores of Teachers Will Take Up Courses By Mail at Once.

That the forthcoming school term at East Central holds out features never yet furnished by the institution is evidenced in a general statement made today by Dr. A. Linscheid, president of the school.

In regard to the quarter he said: "The college will have one of the best male quartets to be found anywhere in a state institution. It is the plan to offer the service of this quartet to county teachers' meetings, or to teachers who are holding community meetings of any kind. The young men will help to enliven these meetings by giving a musical entertainment of a very high order. They will donate their services, and the institution will pay their expenses to these gatherings. Requests for the services of these men are already beginning to come in. This will be one of the advertising features for the next year."

**To Study by Mail**

Many teachers, students and former students, who will not be able to attend classes this fall are anxious to continue their work towards certificates and degrees, and one of the most complete extension division of any state institution is being organized to accommodate them.

Extension work has been called on heretofore, but not so large a scale as is now being arranged. Dr. Linscheid, in speaking of the extension work to teachers said:

"Prof. A. L. Fentem is at present on a trip to various counties in the district in the interest of the Extension Department of the College. His trip will take him not only to the cities and towns in the district but to every consolidated school as well. It will take him from now until September 1 to complete this tour. Interest in extension work is developing at a wonderful rate. All universities and teachers colleges in the west are doing this type of work. It has been strictly true that the institutions which offer this work have had the most rapid growth. Increased interest in the extension department, therefore will probably result in an increased attendance."

**Summer Term Praised**

Many letters of commendation and praise for the work of the past year, especially the summer session, have been received at the office of the Ada college. Dr. Linscheid touched on this subject in his statement, pointing to it as the best answer why the college was enjoying such a rapid growth.

"During the closing days of the summer session a city superintendent of one of the largest cities in the district said: 'This institution is developing into a real college. Never since I have known it has it done the high grade of work that it is now doing; and never has the student-body been so earnest and hard-working. I have never known so many advanced students to attend here before.'"

"This man," Dr. Linscheid's statement added, "is one of the best known educators in the state and a graduate of the University of Oklahoma and has done much advanced work in the University of Chicago. His statement is therefore very significant."

**Compliment Work**

"And as if to bear him out in what he said, another prominent superintendent who completed both his bachelor and his master's degrees in the University of Oklahoma and who has never been co-operating with the local Teachers College, came to my office and said: 'Heretofore I have had my teachers take extension work in the state university and have taught those extension classes for the university; since my coming here I have noted that teachers colleges are quite different from the normal school from which I graduated about ten years ago. I now want my teachers to do their extension work through East Central Teachers College and I shall be glad to co-operate with you in any way possible.'"

Letters from prospective students are being received in every mail at the college office. The full office force works full time to keep the paper work in readiness for the

## Poet Seeks Divorce From Dancer Whom He Wed at Request of His First Wife

(By Central Press)

NEW YORK, Aug. 17.—Nicholas Dunaew, Russian poet-actor, fulfilled the last wish of his late wife—that he care for Nina Betts Byron should she be called by death.

Dunaew pledged his word and to his pledged word was true. He not only cared for her—he married her and installed her on the pedestal once occupied by his dead wife who gave up her life as a nurse in the world war.

Now from a cot in Roosevelt hospital, his head swathed in bandages and recovering from seven operations, a disillusioned poet, his dreams of happiness shattered, is directing the prosecution of his suit for divorce.

And his wife, Miss Byron, the dancer? Oh! she is dancing somewhere in New York, Dunaew believes. But it's only hearsay. She hasn't visited his bedside.

When he was brought to the hospital, penniless, and physicians told him several serious operations would be necessary and that he might not live, he exclaimed:

"Then I must free myself of the woman who, unfortunately, is my wife," and he ordered the divorce action under way.

"She has destroyed my faith in mankind and woman kind," Dunaew said. "I met her in 1915. My wife took a liking to her. We aided her."

"When my wife went overseas as a nurse she made me promise that if anything happened to her I would always care for Nina. Then she died. I remembered my pledge and I kept it and married her."

"We were happy for a while. Then she left me to do stage dancing. I followed her about the country. Two years later I saw her in Boston. She was with the Follies. Then when I was ill and penniless she told me she needed all her money for herself."

"I am no longer worried about my own future. I will get well and

Nicholas Dunaew, Russian poet-actor, marries dancer to fulfill dead wife's wishes.

Nina Betts Byron.

I will be free of that ungrateful woman who has proved again that beautiful faces do not always reflect beauty of mind." Dunaew's divorce action is being prosecuted in Los Angeles.

## 125 Marooned in Desert

But Plucky Passengers Survive Stifling Heat at Needles, Calif., Until Relief Arrives

LOS ANGELES, Calif., Aug. 17.—(Special)—It does not seem possible that a train carrying more than a hundred people could be marooned in any place in the United States, remain with its human cargo for four days in a place almost too hot to live, and cause almost untold suffering.

But that is what happened at the little town of Needles, Cal., where a passenger train on the Santa Fe was deserted by its train crew and the passengers left to secure what quarters were available in the small village. Much suffering was told of by the victims when they arrived in Los Angeles this week after railroad officials had finally succeeded in getting a relief train to the railroad terminal to bring the passengers back to a place of comfort and safety.

Included among the more than 125 passengers was a woman 95 years of age and a baby 18 months old. Two babies were born after the train was deserted, one only a few hours before the relief train departed for this place.

**Aged Kept Alive.**

Passengers who suffered

through the four long, scorching days, kept the infirm and aged alive by liberal use of fans and ice, and milk was obtained after much delay in one or two instances in time to prevent the death of infants. Some of those who were victims of the walkout of train crews declared on arriving here that it was a miracle that all returned alive.

"Grandmother" Wooden, 94 years of age, suffered most. She was kept alive by fanning and liberal use of ice. When she was lifted from the train in the yards here, however, she smiled gamely to the new friends who had cared for her on the marooned train.

Railroad officials treated the unfortunate passengers with consideration and kindness, said Rev. J. E. McDonnell of Stockton.

"All pleas to the striking railroad men to do something for us only drew the retort: 'Go to hell.'"

Much suffering was evident among the children. Most of them were improving rapidly in hotels and hospitals here.

## Pistol Practice to Be Given Guardsmen at Ball Park Today

For the first time since being federally recognized, Second Battalion, Headquarters Detachment and Combat Train, 189 F. A. stationed here, will go on the pistol range. The men have been ordered to report for firing instruction this afternoon, the range being established at Fair Grounds park.

All men who can possibly get away from other duties to take the instruction will be present. As many shots as the men desire will be permitted. Records will be kept of the firing and compared with practice to be held later.

This is one phase of the national guard drill that the local company has not received.

## COLLEGE TO HAVE A 40 PIECE BAND

Fentem to Lead Musicians in Boosting for East Central This Year.

A brass band of forty experienced players will furnish music for East Central college during the coming year. Prof. A. L. Fentem will have charge. An orchestra, organized last year and increased with the addition of a number of musicians will be maintained and promises to be one of the best of its kind in the state.

Pep will be injected into the school and student body through the operation of the band. Athletic events will be featured by music. Glee clubs for both men and women and a male quartet will also be maintained.

It is reported that enough experienced football men will be here this year to give the college a formidable team, much better than that of last season. Letters are being sent out to men over the district, especially the high school stars, asking them to come to the local college and try out.

A winning basketball team is also to be maintained this year. Practically all of the best players of last season, together with some new ones, will be here. East Central was state champion in collegiate basketball last spring and with practically the same team this year, expects to repeat.

A track team was organized for the first time last year. A larger and better one will be supported this season. Men in athletic lines will get to play the state's best will bet to play the state's best teams.

This information is conveyed in a circular letter being mailed out by the local institution to former students.

(By the Associated Press)

ARDMORE, Aug. 17.—So pitiful was the plea of Hart Lantz when he was arrested for alleged operation of stills by Deputy United States Marshal Will Cardwell near Tishomingo that the officer hurried to Ardmore and had his bond fixed at \$25 so he could return to his wife and ten children who are declared to be in very destitute circumstances.

## ROBED FIGURES AT TULSA WHIP LAW VIOLATORS

Masked Court Hears Cases and Lashes Derelicts Who Plead Guilty.

### WOMAN TELLS STORY

Reporter Views Strange Proceedings in Quiet Place Near City.

TULSA, Aug. 17.—Four men were lashed and a fifth was warned by a crowd of 150 men in the robes and regalia of the Ku Klux Klan near here last night. A woman who had been seized by the purported klansmen heard sentence passed on the four men, saw the punishment executed and then fled from her captors while the informal court was debating her sentence.

All of those lashed were local characters accused of selling whiskey. According to a reporter who was taken to witness the whipping, each admitted he was guilty.

Those before the klan court who had sentence passed and executed upon them were:

Earl Lee, Red Fork, charged with selling liquor, 15 lashes.

A young man, name withheld on account of his mother, charged with selling liquor, 5 lashes.

Henry Denby, Red Fork, barber, charged with selling whiskey, 10 lashes.

Claude L. Ivey, city trash hauler, Garden City, charged with peddling liquor; allowed to go free upon promise to go straight.

Bernice Ballard, Fow Dell station, charged with selling liquor, escaped from her guards.

All is orderly. Every thing was perfectly orderly, indicating that the court had been well organized in advance. Beginning about 10:30 o'clock, the proceedings lasted almost two hours.

After the accused's story had been heard, the klansmen decided what punishment would be imposed. Anyone in the circle was permitted to make a suggestion.

In each case after decision had been reached and sentence pronounced, the sentence was executed forthwith. The victim's upper garments were stripped from him, he was forced to kneel, with a husky klansman holding each hand and foot, and then the "executioner" stepped up and applied the punishment decided upon.

## Melon a Perfect Map of Heavenly Bodies in Place

Nature lovers of the city are marveling over a freak watermelon, brought to Ada Thursday morning, the surface of which is said to be almost an exact map of the celestial bodies.

It was raised ten miles northwest of town by Will Goodwin, a farmer.

Moon and stars are strikingly reproduced on the surface of the melon. Even the arrangement of the constellations is natural, those who have examined the phenomenon declare.

The stars vary in size and brilliance and, to add to the spectacle, the Great Bear or the Dipper, the Morning Star, and other members and arrangements of the heavenly system are discernible.

When the melon was small, it is said, the moon appeared as if in its first quarter, later rounding out into its present full form in a natural manner. On another melon, on the same vine, a full moon appeared at first and now is wanting to a mere rim.

Goodwin says the melon is a cross between the "Moon and Star" variety, which is round, and the Tom Watson, a long melon. He will have it preserved and studied by astronomic experts.

## Want a Mate? You May Get One From This 'Love Court'

(By the Associated Press)

HAMMONTON, N. J., Aug. 17.—The court of love—where men and women in search of mates may come—has been established here.

Before the court are the "cases of some one thousand bachelors and eleven hundred spinsters—but the first day's work resulted in only five matings. These however, were held out as examples of what may come."

A man 62 years old, was mated with a gold star mother, 43 years; an undertaker was paired with a nurse; a coast guard was picked to become the life protector of a divorcee; a widow was slated to become the helpmate of a painter and last but not least a daughter of the Kentucky mountains was snatched up by Thomas Pelker, founder of the court.

## 'LOVE HEALER' IS CALLED TO COURT

Divorce Doctor in Chicago Faces Deception Count for His Stunts.

(By the Associated Press)

CHICAGO, Aug. 17.—Albert J. Moore, self styled "love healer," today was brought into police court to face charges of deception in religious work in connection with thousands of dollars he is said to have received from some of Chicago's most prominent society women to "heal their homes" and make them divorce proof. Formal hearing of the case is set for next Tuesday.

Moore is given the title of doctor by his followers and is head of the Life Institute, with headquarters in a building known as the Institution Temple. According to information placed in the hands of the city prosecutors, the institution specialized in home healing and held meetings in its temple regularly. Delegates were sent from the temple to various homes and after a few days of special service the home was pronounced divorce proof.

The complaint against Moore was sworn out by W. W. Talcott, head of the city's largest ice cream manufacturing concern, who said he was acting for his wife.

## REPUBLICANS TO ENTER FOR JOBS

Important County Places to Be Sought This Fall by G. O. P.

Since statehood there have been several elections on which the Republicans of Pontotoc county never put out a ticket, the county being so overwhelmingly democratic that it appeared to be scarcely worth while. This year, however, they will make another effort with candidates named for most of the county offices.

With the exception of district judge and commissioner of the third district, the primary was a mere matter of form for the Republican candidates, there being none except those put out by county convention held sometime ago. For some offices no candidates filed.

W. E. Heady, candidate for sheriff, polled the heaviest vote of the list, receiving 522. G. H. Priest for assessor came next with 485. J. L. Loring, court clerk, received 473; E. J. Merritt, county clerk, 464; G. E. Davis, weigher, 470; J. W. Lewis, treasurer, 427; W. A. Leonard, W. L. Johnson and F. M. Snider were nominated for county commissioner from the respective districts.

Two doctors will make the race for legislative honors, Dr. T. A. Hill for the state senate and Dr. S. M. Richey for the house. Pringley was the choice of the party in this county for congress. More votes were polled in the race for district judge than any other, Barney and Winn each going about 300.

The record number of lightning flashes for England is 1,244 in two hours, counted on June 8, 1889.

## BOMBING PLOTS COME TO LIGHT IN RAIL STRIKE

Burning of Bridge Near El Reno is Reported by the Rock Island.

### WEST GIVEN RELIEF

'Big 4' Brotherhood Ends Blockade of Trains on Pacific Slope.

(By the Associated Press)

OKLAHOMA CITY, Aug. 17.—Federal and county authorities were today coming to Oklahoma City in a search for two men who were seen to start the fire which burned the Rock Island bridge two and a half miles south of El Reno late yesterday. They were traced by federal guards, who pursued them to within a few miles of Oklahoma City when the conflagration was discovered.

Farmers in a field nearby saw the two men whom they described as "foreign looking," fire the trestle. They immediately notified rail officials and guards and a posse was organized. The incendiaries had several minutes' start of their pursuers, however, and the small car in which they were traveling quickly out-distanced the posse.

Repairs to the bridge were completed today and trains which had all last night and early today been detained by way of Geary and Anadarko, were placed back on regular schedule.

CHICAGO, Aug. 17.—An end to the strike of the "big four" transportation brotherhoods on the Western Railroad, an improved outlook for peace in the New York conference today, shootings, bombings and burnings were high lights in the nation's railway crisis during the last 24 hours.

Blockades and tie-ups on the Santa Fe, the Union Pacific, Western Pacific and Southern Pacific cleared up when striking train crews called off their walkout and opened the way to immediate restoration of traffic on lines which were paralyzed by the strike of the big four brotherhoods.

Tentative agreements looking towards an end to the trainmen's strike on the Cumberland Valley division of the Louisville and Nashville were announced at Corbin, Kentucky.

With the train service strike breaking up in other sections of the country, trainmen who interrupted traffic on the Missouri Pacific at Van Buren, Ark., refused to return to work while guards remained on duty in the yards.

**Santa Fe Train Bombed.**

Bombs were thrown at a Santa Fe train which left San Bernardino, Calif., at the first time in six days. George Stambaugh, a brakeman on the Great Northern, was shot and killed at Havre, Mont., by a railroad guard.

William Craft, a blacksmith helper employed by the Denver and Rio Grande since the shopmen's strike, suffered a broken leg and other injuries when he was attacked on the streets of Pueblo, Colo.

Mrs. Neils Hanson, wife of a Santa Fe shopman, was shot and killed in her home. Police took up the trail of two men who are said to have attacked her.

Traffic on the Chicago Rock Island and Pacific was blocked at El Reno, Okla., where a railroad bridge was burned. Farmers reported that two men were seen to fire the bridge.

## FIRST TRAINS ARRIVE FROM PACIFIC COAST

(By the Associated Press)

KANSAS CITY, Aug. 17.—The first trains to come through Kansas City from the Pacific coast over the Santa Fe railroad since last Sunday arrived here this morning.

## HINTON HOPS OFF ON LONG FLIGHT TO SOUTH AMERICA

(By the Associated Press)

NEW YORK, Aug. 17.—Pointing the nose of his seaplane seaward, Lieutenant Walter Hinton, took off from the waters of Jamaica Bay at 7:20 o'clock this morning and started to put behind him the 600 miles to Charleston, S. C., the first hop is the 8,500 mile flight from New York to Rio de Janeiro.

Tibet is the loftiest region of its extent on earth.

## BIBLE THOUGHT OF TODAY

**FRUITAGE OF SECRET PRAYER:**—But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly. For your Father knoweth what things ye have need of, before ye ask him.—Matt. 6:6, 8.

## LORD NORTHCLIFFE

The passing of Lord Northcliffe removes the greatest newspaper man of the century. Northcliffe's career is an interesting one. Beginning life as a penniless boy in a country where opportunities are not as numerous as they are in America he fought his way up to a position of wealth and influence. At the time of his death he controlled sixty papers and periodicals and reached more readers than any other newspaper man of the age, probably surpassing any man who ever followed the journalistic profession. He lived in momentous times and exerted a powerful influence. He could not be classed as particularly brilliant, but was a hard worker and usually level-headed in his views. Above all he had the courage of his convictions and seldom let up until he carried his point.

Northcliffe will be badly missed in the newspaper world, especially in his own country where he set a new standard of newspaper style. The British are slow to take hold of new ideas and the newspapers had jogged along in the same old rut generation after generation until Northcliffe set a new standard of progressiveness. He was always a friend to the United States and through his papers did much to create a better feeling between the two countries.

## FORD'S OPINION OF THE TARIFF BILL

Henry Ford sees no good in the tariff bill which is now in process of enactment. A recent issue of his paper, the Dearborn Independent says:

"In many ways the 1922 tariff law will be the most remarkable ever passed—remarkable in that scarcely any one endeavors to excuse it to the American people. Politicians know that the reasons they formerly gave for high tariff votes have lost their force. Considered calmly, the tariff law which will govern the country is nothing more nor less than a crazy-quilt. It is a shameless repayment of political debts to special interests. Bad as previous tariffs have been, this latest is a brazen defiance of even political expediency. It is a nail in the coffin of the administration and the party and the whole political system under which such things are possible. Maybe that is why the tariff is coming now—to hasten the end of all such farces."

The News does not take much stock in this scrap the magazines and some big papers are putting up for a reduction in the postage rate on second class matter. Under the zone system the big fellows are hit harder than in the good old days before zones were established, but the small papers are not affected to any appreciable extent. However, in their fight for a revision in rates the big fellows are making an appeal on the ground that the little papers are in need of relief. It is something new to see them so interested in the welfare of the small papers all at once.

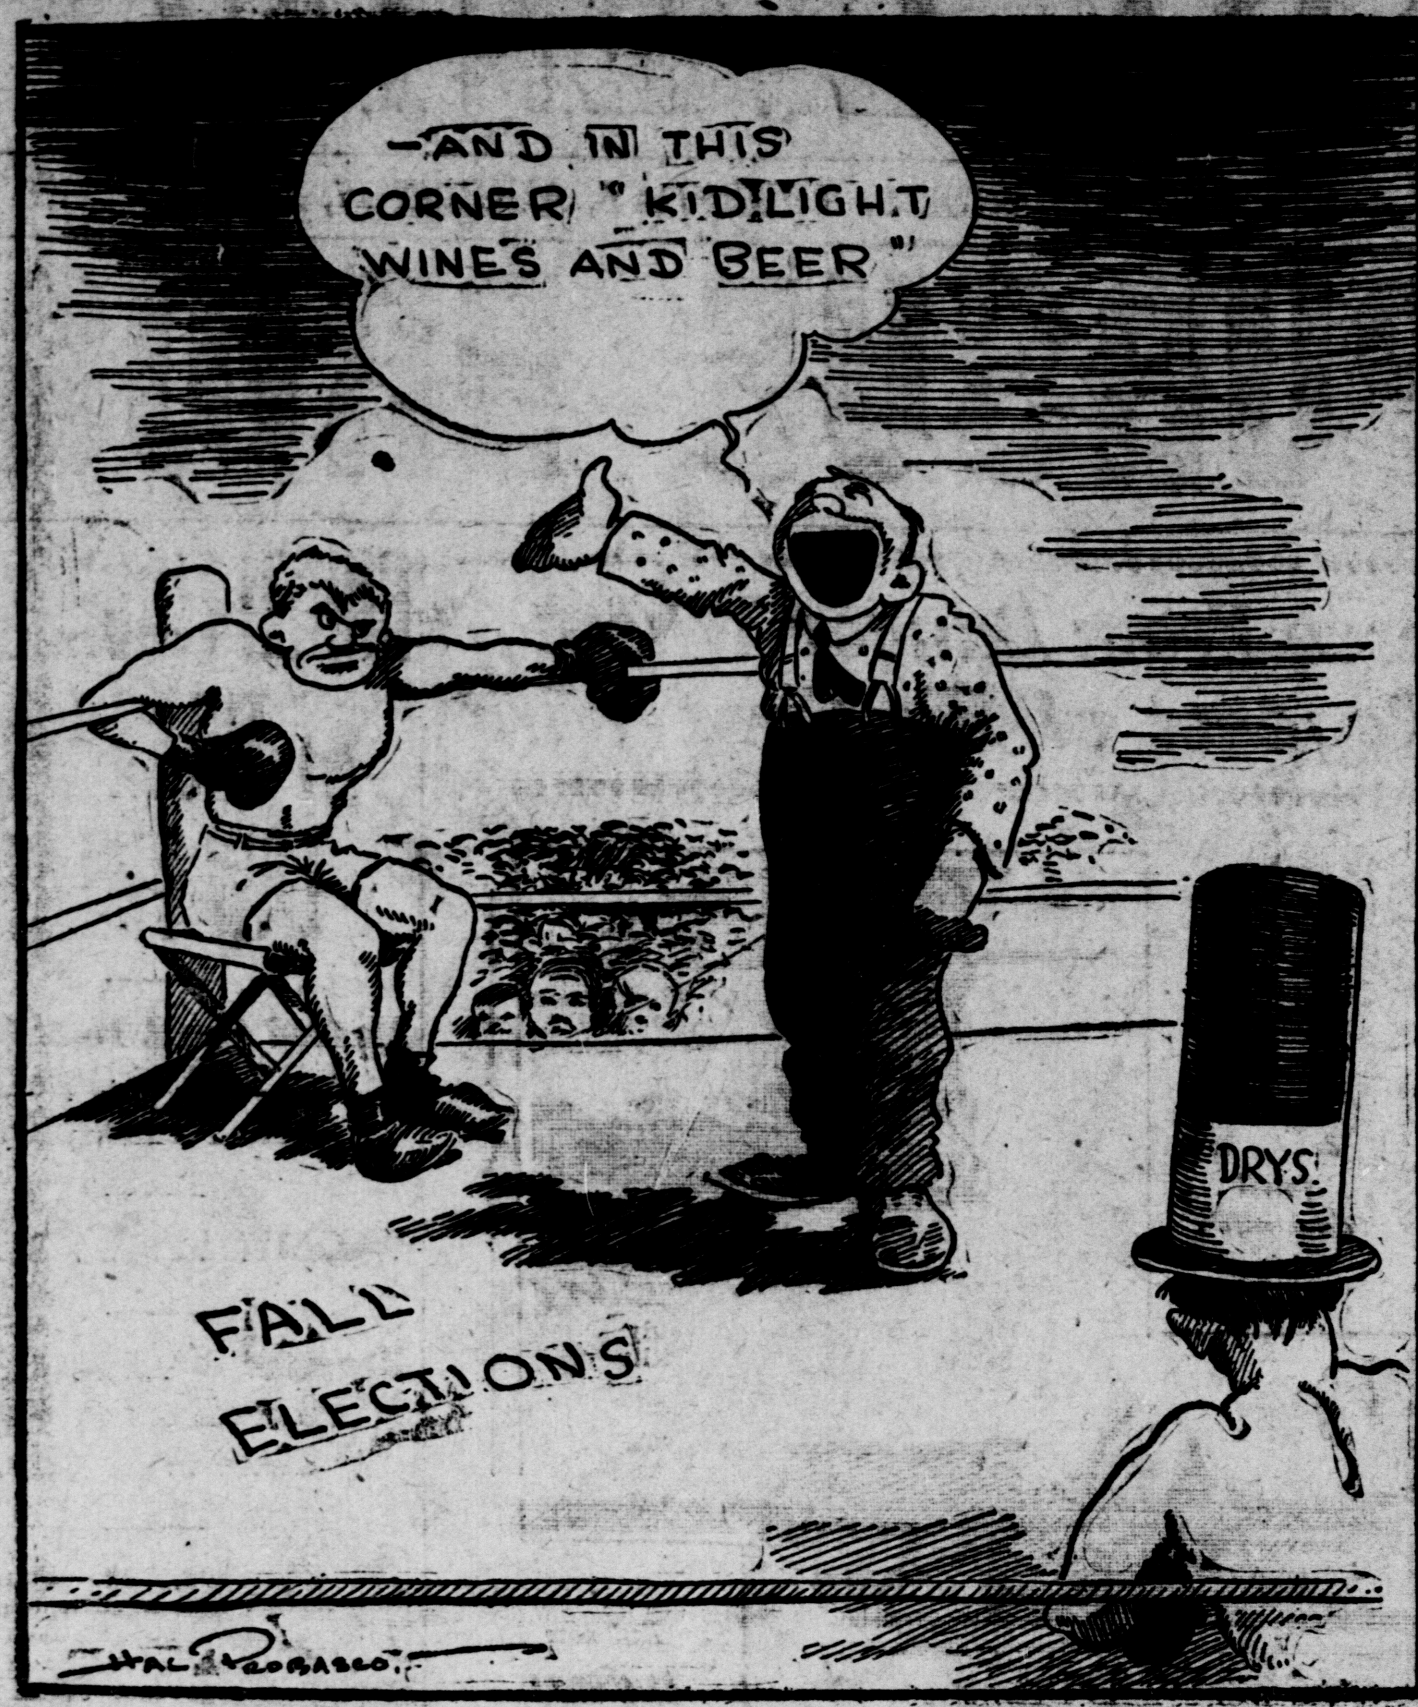

The cleanup notice issued by Mayor Fisher and found in this issue of the News should be heeded by the citizens of Ada without further warning. Cleanliness is the first and most vital factor in maintaining the health of any community and it is to the interest of all concerned to co-operate in cleaning up the city and improving sanitary conditions.

One trouble about advice on any subject is that the one giving it does not always bestow it where it can be followed. It is like presenting a family with a cook book containing recipes for all kinds of fancy dishes when said family is living on bread and water. Fancy dishes are alright but the people with nothing but bread and water can't follow many of the recipes.

It now appears that the coal strike is to be settled and the mines put into operation at once. This will be a great relief to all concerned for the strike has stretched itself out over more than four months. In the final settlement neither side will likely get all it insisted on at the beginning. A compromise will be agreed on which might as well have been made the basis of settlement at the outset.

"A little learning is a dangerous thing," wrote Alexander Pope some two or three centuries ago. He probably had in mind the street corner and goods-box philosophers to be found in every community today: men who know little, make no effort to learn more but who know how the government and every private enterprise in the nation should be run.

## READY FOR THE MAIN BOUT OF THE EVENING

## The Forum of the Press

Crime and Christianity.  
(Muskogee Phoenix)

Again we venture to point out the inseparable relation between the morals and conduct of any community and its religious faith. The man who shrinks most from making this connection, and is worse afraid of using the word "religion" or "Christianity" in a discussion than he is of swearing a mouth filled oath, has come to the crossroads. He has got to take one way or the other.

It is not only our pulpits in these days, but our legal tribunals, our business offices and our newspaper pages that are crying out upon the conduct of the time. "Crime wave," shouts everybody. The laws are too weak, says one. They are badly administered on account of delays and technicalities in procedure pronounces another. Sentimentalists have taken the virtue out of them, replies a third. But all and single are agreed that something must be done, and that the root of evil is in the decadence of the home.

That is the focus of the whole discussion. And it cannot be left superficial, either. Every man, is, to a large extent, what he has been made by forces over which he has neither control nor a very moderate amount. Heredity is one, but immensely more important is environment. As the child grows up, so he is. And he necessarily grows up as the product of the conduct, the example, the conversation and the principles of action in life that he finds about him. The great trouble with divorce is exactly this; not so much its effect upon the married pair as the children.

We find in the waning respect for law, for morals and for decency, the sure and to-be-expected effect of the throwing off of all religious restraint. No civilization ever endured without it. We believe that none ever will.

## Improving the Voters' Literacy

(Minneapolis Journal)

By constitutional amendment and legislative enactment, the state of New York is about to make a novel experiment in improving the literacy of the electorate.

Hereafter no person can become entitled to vote, whether by attaining his majority or by naturalization, unless he is able to read and write English. The rights of those who are already voters are not affected, but the new voter must show that he is not illiterate.

He may secure from the school authorities a certificate of literacy on presenting evidence that he has completed the work prescribed for the fifth grade of the public schools, or its equivalent in private schools or schools outside the state.

Lacking this certificate he may be required by the election officials to read fifty words of the state constitution and write ten words.

This appears to be a practical and commendable plan to increase the knowledge and use of English among new voters. A young man or woman, attaining majority and seeking the privilege of the franchise, certainly has no excuse for illiteracy in this country of free and compulsory education. The alien, who seeks naturalization is under obligations to show the earnestness and sincerity of his desire to become a citizen by acquisition of the use of English.

## FASCISTI TO QUIT; ITALIAN WAR ENDS

Benito Mussolini.

Benito Mussolini, leader of the Fascisti in Italy, has ordered the demobilization of that organization. The Fascisti has been fighting Italian radicals. Recently the government ordered the leaders to stop their offensives against the Italian reds.

## A Significant Action.

(Wichita Daily Times)

This paper some time ago pointed out that levity was threatening to destroy the prohibition amendment.

In the press, on the stage, in clubs, on the street cars and everywhere violations of the prohibition laws are being treated as jokes. This paper itself has been guilty in this matter. Nearly every newspaper in the country has had a share in the guilt. It is not right and is something that will be stopped if given sober and serious thought.

And the press is beginning to look at the matter in that light. The jokes about prohibition are becoming fewer, although this may be as a result of virtue but because the public wants a change of subject. The announcement has just been made that no jokes about violations of the prohibition laws will be staged in any old Keith circuit vaudeville theaters. There are Keith theaters in every large city in the United States and the announcement reflects the changing view of the stage and the public as well regarding the prohibition amendment. The attempt to ridicule prohibition out of existence has failed. The action of the management of the Keith theaters is significant.

## LEGION OFFICERS MEET TO DISCUSS HOSPITAL PLANS

(By the Associated Press)

OKLAHOMA CITY, Aug. 16.—The American Legion rehabilitation committee for the fourteenth district, comprising the states of Oklahoma, Arkansas and Texas, met yesterday in Dallas. Members of the committee attending from Oklahoma were Dr. D. W. Griffith of Norman, Henry D. Rinsland of Ardmore and Leon H. Brown, acting Oklahoma department adjutant, according to Mr. Brown. There are ten members of the committee in the three states.

The subject discussed at the meeting, Mr. Brown said, was the expenditure of the fund of \$18,000, 000 appropriated by Congress in the Langley bill, for building hospitals for the relief of ex-soldier mental cases.

The building program outlined in the bill making the appropriation was placed under the direction of Brig. Gen. Charles E. Sawyer, the president's physician and chief coordinator of the federal board of hospitalization, according to Mr. Brown.

C. C. CHILDERS

C. C. Childers for State Auditor won the nomination for State Auditor over his nearest opponent by 6,673 votes, and carried 51 counties; he is very thankful to all his friends and supporters and is looking for a great democratic victory in the November election.

The adjutant said that General Sawyer was criticized at the meeting for lack of action in carrying out the hospital building program, and a resolution framed which will be taken up at a meeting of the national rehabilitation committee of the legion at an early date, calling for immediate carrying out of the program.

## Political Announcements.

The News is authorized to announce the following as candidates for the offices named, subject to the action of the Democratic primary.

## State Offices

FOR DISTRICT JUDGE:  
J. W. BOLEN

For State Senate:

## First Compounded This Remedy for My Own Neighbors

Their praise of this newer form of iron has spread so rapidly that now, after nine years, over 4,000,000 people use it annually.

Years ago I began to wonder at the great number of my own friends and neighbors who were always ailing, complaining and doctoring without ever seeming to get any better. Both working men and their wives were frequently all tired out in the evening, and a great many were weak, nervous and run-down. One had pains in the back and thought he had kidney trouble. Another had pains around the heart, palpitations and dizziness, and was sure he was suffering from heart disease. Still others had severe headaches, floating spots before the eyes, tender spots along the spine and a great variety of alarming symptoms.

For years I made a special study of this condition, consulting a great number of physicians and chemists. An immense number of investigations by physicians all over the country showed that three people out of every four you meet lack 100% iron in their blood. Lack of iron in the blood is the greatest of all devitalizing weaknesses. It is the iron in your blood that enables you to get the nourishment out of your food. Without iron nothing you eat does you any good. Your heart, lungs and kidneys and all your vital organs get their nourishment from the blood stream, and when the blood lacks iron and is thin, pale and watery, you may suffer from the symptoms of a great number of diseases when the real and true cause of all your trouble is a lack of iron in the blood.

In the old days people often took metallic iron, which some physicians claim is not absorbed at all. In compounding Nuxated Iron I use the newer form of iron, which is like the iron in your blood and like the iron in spinach, lentils and apples. Unlike the older forms of iron, it will not injure the teeth nor disturb the stomach, and it is ready for almost immediate absorption and assimilation by the blood. It is the people whose blood is rich in iron who possess great strength, force and energy. If you are not strong or well you owe it to yourself to make the following test:

See how long you can work or how far you can walk without becoming tired. Next take two 5-grain tablets of Nuxated Iron three times a day after meals for two weeks—then test your strength again and see how much you have gained. An astonishing number of nervous, run-down people who were ailing all the while, have greatly improved their health and increased their strength, energy and endurance simply by taking this newer form of iron.

## IRENE CASTLE CHOOSES TRIBUTE TO FORMER HUSBAND; DENIES SHE POSED

"The End of the Day," chosen by Mrs. Robert Treman to mark the grave of her first husband, Vernon Castle.

This life-size carving of an undraped, crouching, feminine figure has been chosen by Mrs. Robert Treman to mark the grave of her first husband, Vernon Castle. It was recently put in place without the ceremony of an unveiling. Sally James Farnham, the sculptress who designed the memorial for Mrs. Treman, supervised the work of placing it on its pedestal over the grave. It is called "The End of the Day" because it best expressed her idea of aiding affection. Vernon Castle, well known as a dancer, met his death four years ago at Kelly Field while in the U. S. aviation service. Mrs. Treman denies, however, that she posed for the work.

### Honors, Tenth Birthday

Unusual interest marked the pretty little party given Wednesday night by Burma Wheeler, at her home 314 East Fourteenth honoring her tenth birthday. A large number of her friends were present.

The first part of the evening was spent in playing games in the yard, which was attractively decorated in Jack-o-lanterns. Later the little visitors were entertained by music by Mr. Wheeler, father of the hostess, and readings by Louise Koonce. Refreshments consisted of candy, watermelon, lemonade and cake. Guests included Edna Johnson, Frances, Louise and Nillie Nell Cotten, Mary Bledsoe, Grace and Louise Hood, Ruth Yates, Edna and Ruth Tipton, Georgia Koonce, Le Roy Johnson, Harold Jeter, Guy Barnes, and Martin Landers.

The highest speed ever attained on a railway—131 miles an hour—was made by an electric locomotive in 1902.

The young lady across the way says she doesn't see any particular objection to being it they aren't allowed to use heavy enough gloves to protect each other's skin.

## PRESIDENT ASKED TO DEFER SPEECH

Union Chiefs and Rail Men  
May Compromise Their  
Troubles Alone.

(By the Associated Press)

WASHINGTON, Aug. 17.—President Harding had not completed, early this forenoon, the address on the strike situation which he has been intending to deliver today to a joint session of congress, and close advisors continued to urge him to defer his appearance, at least until after today's conference of railroad men in New York.

Results that might come from that meeting, it was intimated, might affect some phases of the situation with which Mr. Harding was expected to deal, and he was represented as being desirous of withholding it if there were any possibilities that the union chiefs and rail executives could show prospect of compromising their differences. Mediation activities which have been in progress here were practically suspended as most of the striking shopcrafts representatives and heads of the four big non-striking unions were in New York to meet the executives' committee today.

## GREAT THRONGS PAY HOMAGE TO FAMOUS EDITOR

(By the Associated Press)

LONDON, Aug. 17.—The funeral of Viscount Northcliffe was solemnized at noon today in Westminster Abbey. Seldom has the last tribute to any Englishman whose position was wholly personal and unofficial, drawn such an assembly.

The Dean of Westminster undoubtedly expressed the public wish when he asked Lady Northcliffe to permit the rites to be celebrated in the Abbey. The great company of prominent people, gathered within the edifice, as well as the crowds of humbler ones in the street outside, gave testimony to this.

The American ambassador, George Harvey, was among the host of mourners, chief of whom were the widow, Viscount Northcliffe's aged mother, and his six brothers.

## Anthracite Miners May Return to Pits Following Meeting

(By the Associated Press)

PHILADELPHIA, Aug. 17.—The return to the mines of anthracite workers was expected to follow today's conference between officials of the miners' union and operators here. The miners' scale committee has been asking a 20 per cent increase in their pay. The operators wanted a reduction in wages. Both sides, it was intimated as the conference was about to convene, were ready to recover from their stand and close observers declared that there was a likelihood of 1921 wage schedule being adopted for another year.

## INDIANA GOVERNOR IS STRONG AGAINST FIGHT

INDIANAPOLIS, IND., Aug. 17.—Interest in the controversy over the holding of the proposed Jack Dempsey-Bill Brennan fight at Michigan City on Labor Day, switched to LaPorte county, following the announcement by Governor McKee that he would give officials of that county until Friday to order the abandonment of the bout.

## In The Oil Fields

The Lancaster Syndicate, formed by Ollie Lancaster of Ada, has spudded in for a well on the Mullins farm in section 5-4-5, a half mile west of the discovery well in the Bebee field. The drilling contract is with Harper and Sons of Wichita Falls, and calls for a 2,500 foot hole if it is necessary to go to that depth to get a good producer.

This location is generally considered good and the progress will be watched with interest.

The Carter well just north of the discovery well has had a fishing job for several days. Reports from the field this morning were that this had been completed and drilling will start at once. This well is something more than 1500 feet and the sand should be reached in a week or ten days, barring accidents.

The fact that three wells are to go down just north of the city is causing some activity in that section. There has been a belief among many of the citizens that a pool of oil lies near the great gas wells of the American All and Refining Company, and the three wells ought to be some evidence as to the correctness of this view.

The well near Dolberg is drilling around 1100 feet according to reports from the field this morning.

## STATE WILL CONCLUDE KLAN HEARING TODAY

(By the Associated Press)

LOS ANGELES, Aug. 17.—The state expects to conclude either late today or tomorrow its case against 36 alleged members of the Ku Klux Klan indicated for felonies in connection with a raid by masked men on the home of Matias and Fidel Elduayen at Englewood, a suburb, last April, it was said today.

## AMERICAN LEGION

### Calvin Forms Post.

Albert L. Pressley of Calvin, who recently was in the University hospital at Oklahoma City through the aid of the American Legion and the Soldiers' Relief Commission, is a firm believer in the American Legion. Since reaching home he has written department headquarters that he has 20 names signed to a request for an application for a charter of a Legion post at Calvin and states that he believes 40 or 60 men will join immediately if a charter is secured. An application blank for a charter has been sent him.

One of the features of the National Convention of the American Legion Auxiliary in session at New Orleans during the Legion Convention October 16-20 will be a state dinner Monday October 16. Each state will be assigned a table and every woman attending the convention will be invited to sit at her state table. Mrs. Earl Patterson, President of the Oklahoma City unit, has been appointed chairman of the Oklahoma table by Department Commander Mrs. Blanche Freeman, who will be toastmistress.

### "Hardboiled" Man Fired

Dr. J. R. Patton, U. S. Veterans Bureau attaché, has been transferred from the bureau's Burlington Vt. office following charges of the American Legion that Patton used "hardboiled" tactics in dealing with sick and wounded veterans who applied to him for examination. In announcing Dr. Patton's change of duty, director Chas. R. Forbes, head of the bureau, stated transfer was "for the good of the service."

### "Blessed Heaven" Opened

To fill a big gap in the wounded veterans' life between the time he leaves the operating room and returns to his home, the American Legion at Wildwood, N. J., has opened Blessed Haven, a retreat for convalescent ex-service men. The haven was built and will be maintained by one member of the Legion, Byron Pennington Croker post, and was established primarily to take from the hospitals those veterans who have completed treatment but who are still too weak to return to their homes.

### Elaborate Plans Laid

"The best news since the signing of the Armistice" reads the headline of an announcement of a poster sent over the state, where in Bartlesville pledges "Best endeavors to citizenship, the civic clubs and fraternal organizations to make the 1922 Legion convention the best ever held in Oklahoma." From all reports Bartlesville is laying plans as if there was to be a national convention held here.

### Veterans Give Blood

More than half of the 500 wounded veterans in Walter Reed hospital at Washington, D. C., have undergone blood transfusions. The men who volunteer for the most part are American Legion members who have obtained work around the hospital as ambulance drivers, special police, etc. The only remuneration these veterans take for giving blood to their comrades is a ten day leave to recover.

### Churches Cooperate

Russell Litchfield post No. 7 of Blackwell, last winter guaranteed Redpath-Homer \$1,500 to bring a chautauqua there this month. Four churches of the city got behind the Legion, and agreed to assume four-fifths of any loss and all are co-operating to put over the chautauqua. The Legion recently refused an offer of \$300 cash for the use of their name by a carnival company.

### Inter-Allied Vets Meet

The annual convention of the Inter Allied Veterans' Federation will be held in New Orleans October 11-13, just before the Legion convention October 16-20. Veterans from eight principal allied powers will meet at the gathering to be known as the Convention of Peace. Many Oklahomans will attend using the reduced fare certificate allowed for the Legion convention.

### Sponsor Milk Fund

Bernard Gill post No. 16, Shawnee, has during the summer sponsored the milk and ice fund for the city's needy children. The post took charge of the drive early in the summer under the leadership of Frank V. Sims, Commander, and Sam B. Mohr, Adjutant, many contributions being made.

### Deaf Artist Scores

Two recent issues of the American Legion Weekly, the official publication of the American Legion, carried cover designs one of which was painted by a man totally deaf, and the other by a disabled veteran, both of which are members of the Society of Illustrators Schools for disabled veterans.

### Veterans Adopted

A number of Richmond, Va., world war veterans have so far been unable to establish their claims for compensation although all are suffering from wounds or sickness due to war time military service. These men have been "adopted" by a local unit of the American Legion auxiliary which is providing them with necessities and medical aid.

### Hatcher Heads College

James F. Hatcher of Chickasha, Chairman of the Americanism Committee of the American Legion of Oklahoma has been elected president of the Central State Teachers College at the annual business meeting of the association.

## VERSES HAVE NO PLACE IN MODERN LIFE, SAYS POET

W. B. Yeats.

A poet decrying his own wares is the position of W. B. Yeats, celebrated English versifier. Realistic literature and truth to fact, not poetry and fancy, are the needs of the present generation in his belief. Yeats not only looks and dresses the part of a poet, but he has been accorded first place among modern writers of verse, yet he says there is no place in the modern world for poetry.

### PARISH CHAPEL

This community was surprised Monday evening with a nice rain which was badly needed.

Arlie Beavers was the guest of Bennie Thompson Friday night.

A bunch of young folks went to preaching Sunday night at the arbor at Summers Chapel.

Mr. and Mrs. Maddox spent Sunday with Mr. and Mrs. Sam Maddox. Alva and Claud Pennington and Mr. and Mrs. Thompson made a business trip to Ada Saturday.

Everybody feels better after the rain Monday.

Jewel Isaacs spent Sunday night with her friend Zella Pennington.

Mr. and Mrs. Holland and family of Maxwell were the guests of her cousin, Mr. and Mrs. Wood Sunday.

Also Mrs. Florence Isaacs Isaacs and Mrs. Alla Ingram were there.

## RADIO

### VACUUM TUBE WHEN USED AS AMPLIFIER

It Will Function Thus for Either Radio Frequency or Audio Frequency.

Starting today we shall give a detailed description of the vacuum tube when used as an amplifier. This series, as in the past, is continuous and if clipped out and saved will be convenient for reference.

When the three-electrode vacuum tube was used as a detector, the circuits associated with it were such that where a symmetrical alternating difference, was applied to the grid, a symmetrical change in plate current resulted. That is to say, the vacuum tube acted as a rectifier. In addition to rectifying, the tube also amplified. The variation in plate circuit was "K," where "K" is the amplification constant of the tube, times that it would have been in a two-electrode tube, for the same potential impressed on the grid.

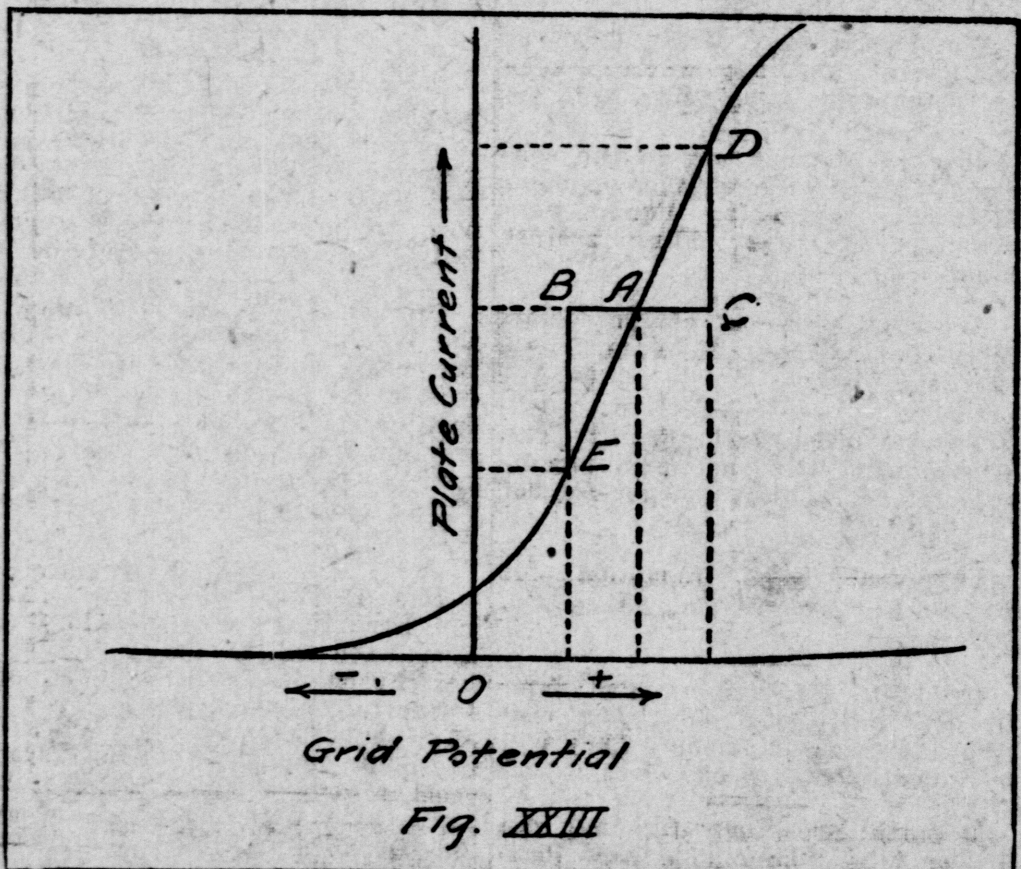

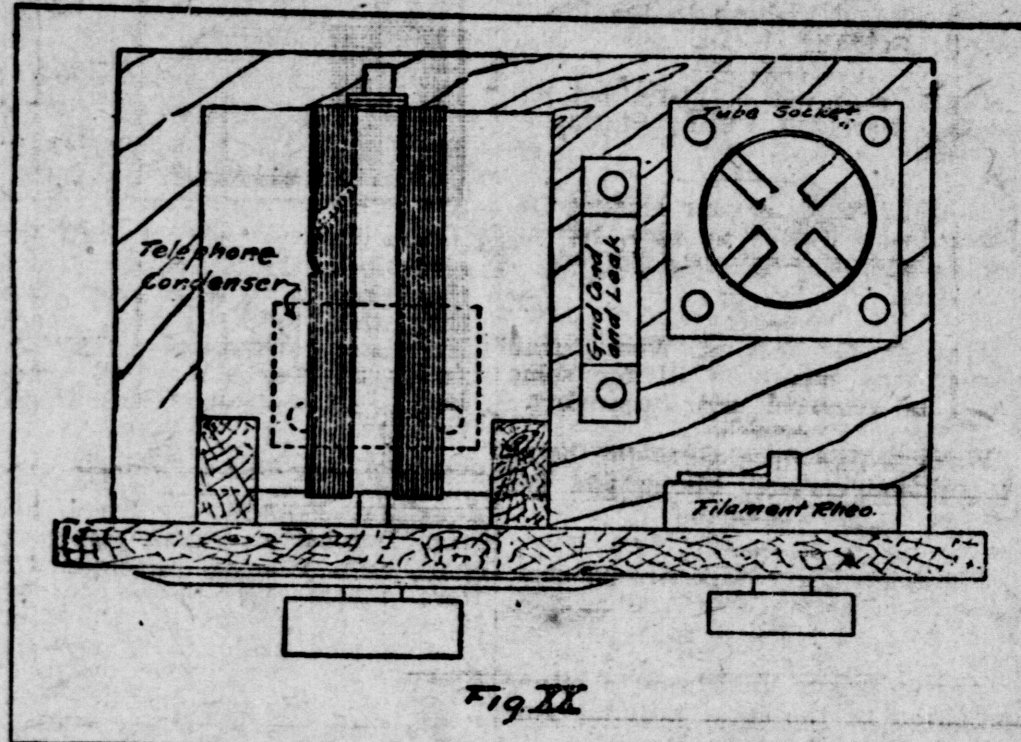

By properly adjusting the electrical constants of the circuits associated with a three-electrode tube, symmetrical

straight line, then  $OD$  will equal  $BE$ , or so long as the working range falls within straight line portion of the characteristic curve, symmetrical changes in grid potential will cause symmetrical changes in plate current. From this it can be seen that if the working point "A" be selected near the bend of the characteristic curve, symmetrical changes in grid potential will not cause symmetrical changes in plate current. Since the plate current variation in such case would bear only slight relation to the grid variation in potential, the output of the tube would be distorted.

In applying amplifiers to receiving sets used to pick radiophone stations, distortion is one of the greatest difficulties to overcome. Too strong signals will result in decreased amplification. In Figure 23, if the applied variation in grid potential were 10 times that shown in the example, the plate current would not change 10 times as much, because of the bends in the curve, due to saturation. Finally, a condition can be reached where the use of an amplifier tube will decrease the signal strength because of the saturation of the tube.

The rectified incoming signals would be louder without the use of the amplifier tube, because of the inability of the plate current of the tube caused by saturation to increase in proportion to the signal strength.

There are, in general, two factors that can be taken from the characteristic curve and the second is the length of the straight portion of the curve. The slope of the straight por-

cel variations of grid potential can be made to produce symmetrical variation in plate current, which are "K" times the amplitude of the plate circuit variations of a similar two-electrode value with the same applied grid potential. This means that if a three-electrode value be used in the proper circuits in a radio receiver, the signals can be made to appear as though the received signal is "K" times as strong as it actually is. If two tubes are used with their proper circuits in conjunction with a radio receiver the received signals will appear to be "K" times as strong as they actually are and so the apparent strength of the incoming signal is multiplied by "K" for each additional tube added to the receiver circuit.

A vacuum tube used in conjunction with a circuit that will cause the plate current to vary in exact proportion to the applied grid voltage, but apparently caused by "K" times the actual grid voltage variation, is called an amplifier. If the tube functioning as an amplifier is used to amplify the incoming signal at radio frequency before it is rectified by the detector, it is termed a radio frequency amplifier. If the tube functioning as an amplifier is used after the incoming radio frequency has been rectified by the detector, it is termed an audio frequency amplifier.

Returning again to the characteristic curve of the three-electrode vacuum tube, shown in Figure 23, notice its shape. Suppose that a positive potential was applied to the grid by means of a "C" battery so that the tube would function at a point represented by "A" on the characteristic curve. If now the applied grid potential from the "C" battery be reduced by an amount represented by A-B in Figure 23 the corresponding reduction in plate current will be represented by B-E. On the other hand if the grid potential be increased by an amount represented by A-C, where A-C equals B-C, the corresponding increase in plate current is CD.

If the portion of the characteristic curve in the region of E-A-D is a

tion of the curve determines the amplification of the tube. The more nearly vertical the straight portion of the curve is, the greater will be the change in plate current for a given change in grid potential, or in other words, the louder will be the response in the telephone receivers corresponding to a given received signal. The length of the straight portion of the curve determines the maximum variation in grid potential that will cause the tube to function properly without distortion.

### TIPS TO RADIOISTS

At Muncie, Ind., bacon was fried by means of a radio current. At last an explanation for that "frying" noise.

Gifford Pinchot, nominated for governor of Pennsylvania by the vote of the people, acknowledges his great indebtedness to the radio. A primary coil no doubt played an important part.

An inventor of Chicago claims to have invented radio apparatus that permits of successful communication with the spirits. We hope that the anti-prohibitionists will not misinterpret this claim.

The police department of Portland, Ore., has asked for an appropriation for radio receiving and broadcasting stations and to equip the police automobiles with radio apparatus. Copper wire, it is needless to say, will be used.

Lord Northcliffe, famous English editor, in speaking of the future of journalism, recently predicted that radio would have an effect upon the publication of newspapers that will equal the invention of the linotype and high-speed press. He said that radio would undoubtedly come into general use of newspapers and newsgathering agencies.

I wish to thank my many good friends for the kindness and courtesies shown me during the illness of Mr. W. W. Curran, who recently died at Faust Hospital. Also for the beautiful floral decorations. J. H. Lucas.

Try a News Want Ad the results.

### Gloria Swanson Coming

Glorious Gloria Swanson, beautiful Paramount star, will be seen at the McSwain theatre next Monday and Tuesday in a new picture, "Beyond the Rocks." It is based on Elinor Glyn's famous novel of the same name which scored a big hit several years ago. Rudolph Valentino, who supported Dorothy Dal-

ton in "Moran of the Lady Letty," is her leading man and he heads an unusually strong supporting cast of players.

The first glass works in Lithuania have been opened near Radviliskis. The sand in the neighborhood is very good for glass making, and the plant is said to be efficient and of considerable size.

### OAK AVENUE BAPTISTS WILL START REVIVAL

A revival meeting will open at Oak Avenue Baptist church Sunday, August 20, with the pastor, Rev. J. H. Page, doing the preaching. S. J. Rhodes of Fort Worth will have charge of singing. An invitation has been extended to the public to attend.

**Get Your Share - of Extra Mileage**

IT is all true—every word of the news that's going around about Firestone mileage records and the phenomenal sales that have resulted.

Chances are you really haven't heard the full story of the wonderful success of Firestone Cords. We'd like you to call and get the actual facts. That is one sure way to make your next tire purchase a logical business buy. We'll explain the blending and tempering of rubber—double gum-dipping—and the air-bag cure—special Firestone processes.

The unusual mileage being made everywhere will stir your ambition to reduce the operating costs of your own car.

A call on us entails no obligation. Get the records—divide the distances these Cords are covering by Firestone prices. Then you'll be convinced that Most Miles per Dollar means what it says.

Drop in—Any Time

## From the Four Corners of the Earth

North, South, East and West—all have something to tell you in the newspapers.

News columns give you items of interest in the political, financial and social worlds. Advertising columns give you information just as interesting, and even more valuable to you—news of the things that have to do with your personal, every-day life.

The advertisements spread out for your inspection the products of progressive manufacturers the country over—the comforts and conveniences that play so large a part in modern life. The wares of every progressive merchant in town are laid attractively before you.

From your easy chair you read the offerings, compare values, check the statements against your previous experience and then make your selections.

Thus you save time, money and the effort spent in useless "shopping around." And you gain in the satisfaction that comes from a purchase well made. Keep up on the shopping news.

Read the advertisements before you buy. It pays.

(Published August 10, 11, 12, 14, 15, 16, 17, 18, 19, 21, 1922.)

Notice to Paving Contractors  
Notice is hereby given that in pursuance to Paving Resolution No. 14—3, passed by the Board of Commissioners on the 8th day of August, 1922, sealed bids will be received at the office of the City Clerk of the said City until 2:00 P. M. on the 22nd day of August, 1922, for the furnishing of the materials and the performance of the work necessary in the paving and otherwise improving, in the manner and subject to the conditions herein after set out, of a portion of Broadway in the City of Ada, Pontotoc County, Oklahoma, heretofore established by Resolutions passed by the Board of Commissioners, to wit: Street Improvement District No. 11, South Broadway from the south line of Twelfth Street to the Center line of Thirteenth Street, together with alley crossings and street intersections not now paved, and all in the City of Ada, Oklahoma.

The cost of such improvements on such said avenue, including street intersections and alley crossings shall be borne and paid by the owners of the property, benefited by such improvements upon the said portion avenue hereby ordered to be paved. The entire cost of said improvements on said portions of such avenue shall be assessed against the abutting property liable to assessment therefor, and the owners thereof, in accordance with the provisions of the State Laws of Oklahoma governing the same.

The plans and specifications for the improvement of the said avenue have been prepared by the City Engineer, and have been adopted by the Board of Commissioners, and include and set forth in detail all the different materials and plans and methods of construction hereinafter set out. The plans, plat, profiles, specifications and estimates are on file in the office of the City Clerk.

The Class of Pavement to be constructed shall consist of single course plain concrete seven (7) inches in thickness.

Bids must be submitted upon proposal sheets to be furnished by the City Engineer, and each bid must be accompanied by a certified check on some solvent bank in the State of Oklahoma, or a satisfactory bidder's bond in the amount of approximately five (5) per cent of the total cost of the work based upon the contractor's bid. The Board of Commissioners reserve the right to reject any or all bids, and bidders are cautioned to observe all the conditions set out in the specifications and bidding sheets.

Each bidder shall accompany his bid with a sworn statement in writing that the bidder has not directly or indirectly entered into any agreement, expressed or implied with any other bidder or bidders, having for its object the control of the price, and amount of bids, or limiting the number of bidders. No bidder shall divulge sealed bids to anyone whatsoever except those having a partnership or other financial interests with him in said bid, until after said bids are opened. The violation

of any of the foregoing provisions on the part of the bidder shall make void any contract made by him with the City of Ada, based upon his bid, all as provided in Section 1, Article IX, of the Charter of the City of Ada, Oklahoma.

Bids received as aforesaid will be opened and considered by the Board of Commissioners at a meeting to be held at the City Hall in the City of Ada, Oklahoma, at 2:00 P. M. on the 22nd day of August, 1922. All bids are required to be placed on file in the office of the City Clerk for forty-eight (48) hours after opening before the award or rejection of bids can be made.

The contract will be awarded to the bidder submitting the most advantageous bid therefor, who will undertake and perform the work and furnish the materials according to the plans and specifications, and who will also comply with the terms and conditions contained in the resolutions of the Board of Commissioners of the City of Ada, declaring the necessity and providing for the improvement of the above named avenue. A copy of such resolution will be furnished to bidders upon application therefor at the office of the City Clerk.

The Contractor shall receive for the above work, including printing and other incident costs and fees, Street Improvement Bonds at their par value against the abutting property according to Sections 608 to 642, Article XII, Chapter 10, of the Revised Laws of the State of Oklahoma, 1910, and amendments thereto.

The Contractor to whom the contract may be awarded will be required to execute and furnish the City a good and sufficient Construction Surety Bond in amount equal to fifty (50) percent of the whole bid, conditioned for the full and faithful execution of the work, and the performance of the contract.

The Contractor will also be required to execute and furnish the City, a good and sufficient Statutory Bond in the full amount of the contract price, running to the State of Oklahoma, which bond shall guarantee the payment of all bills for tools, machinery rental, labor and the performance of the contract. The Contractor will also be required to execute and furnish the City, a good and sufficient Statutory Bond in the full amount of the contract price, running to the State of Oklahoma, which bond shall guarantee the payment of all bills for tools, machinery rental, labor and the performance of the contract.

The Contractor shall also furnish before the allowance of the final estimate and acceptance of the work, a Maintenance Surety Bond in the amount of approximately three (3) per cent of the cost of the work contracted for, conditioned for the maintenance in good condition of the paving, curbing, and drainage for a period of five (5) years from the time of completion and acceptance by the City.

Complete plans and specifications can be seen and consulted in the office of the City Clerk, Ada, Oklahoma. Plans and specifications are also on file in the office of the City Engineer, and may be examined by all persons interested.

Dated this 8th day of August, 1922,  
J. C. DEEVER, City Clerk and Commissioner of Accounting and Finance.  
(SEAL)

8-10-10td  
Citizens! Please Take Notice And Act

It has come to the attention of the Mayor that there is considerable trash and filth allowed to accumulate on the premises of some of the citizens of Ada, and it is allowed to continue will produce contagious diseases which will eventually cause trouble in our midst. You are therefore requested and asked to cooperate with the City Commissioners in a clean up campaign to begin August 18th, 1922 and continue until the 1st of September.

It is not the purpose of the Mayor to cause any trouble with the citizens but it is absolutely expedient and necessary that the City of Ada be cleaned up beginning with the house, front yard, back yard and alley on your premises. Done by order of the mayor, this 17th day of August, 1922.

City of Ada, Oklahoma,  
By W. H. Fisher, Mayor, Commissioner of Public Justice and Safety.

## WAGE LAW GIVES GRIEF TO LABOR

Connally Shows Defect in  
Not Centering Power  
With Counties.

(By the Associated Press)  
OKLAHOMA CITY, Aug. 17.—The current rate of wages law which affects workers employed on public projects in the state is the cause of most of the prosecutions of employers instituted by the state department of labor, and should be amended to place the responsibility for determining the current wage and enforcing it on county and other local officials, according to Claude E. Connally, commissioner of labor.

This is Mr. Connally's outstanding recommendation in a special report he recently submitted at the request of Gov. J. B. A. Robertson. His report showed the duties of his office, the operation of the department, and recommendations not only for the broadening of those operations in the future but also for extending and amending the labor laws of the state.

In discussing the current wage law the commissioner said in part:

"The law requiring contractors and public officials engaged in the construction and operation of public enterprises to pay not less than the current rate of wages in the locality where the work is performed has given this department more concern than any of the labor laws. Due to the fact that there has been an easy labor market for contractors the tendency among them has been to reduce wages of manual laborers below the point of respectable subsistence.

"This law should be changed to place the responsibility for the wage scales on local public officials, as the question of what constitutes the current rate of wages in any locality is oftentimes hard to determine; this is especially a difficult matter after the contracts have been let. Large numbers of needless prosecutions against contractors have lately been instituted which in the future would be avoided if the law is changed as suggested."

Two other outstanding features of the recommendations made by the governor follow. That the legislature should pass an adequate wage collection law for the protection of all classes of laborers, especially those engaged in manual occupations, and that a bureau for women and children should be established in the labor department, to be under the direction of a woman.

Many Cases Needless.

With respect to the administration of the protective laws for women and children engaged in industry, Mr. Connally's report said: "There have been a large number of prosecutions instituted against employers for the violations of the laws covering the employment of women and children, which would not have been necessary had there been established in this department a bureau to handle this particular branch of the labor problem of this state, with an adequate personnel, to keep closely in touch with the conditions affecting their employment throughout the state."

An increase in the budget for the operation of the department of labor amounting to \$15,900 over the appropriation for 1923 was suggested in the labor commissioner's report. The sum granted by the last legislature was \$41,470, \$650 less than that for the year 1922.

Employees of the department now are the commissioner, at a sal-

ary of \$2,000 a year, the assistant commissioner, at 1,500, four men factory inspectors and one woman inspector, at salaries averaging \$1,500, four superintendents of local employment bureaus, a statistician and a stenographer. The department supports five local employment bureaus, at Oklahoma City, at Ardmore, at Tulsa, Muskogee and at Enid. The present budget calls for small contingent funds for the operation of these offices, for the gathering of statistics, for an arbitration board to settle industrial disputes, to pay expenses of travel for factory inspectors, and other expenses for the commissioner and his assistant.

Need Two Clerks.

In the administrative office, Mr. Connally reported, there is need of two additional clerks. Three more factory inspectors are needed, he said, and two employees, with traveling expenses, for the women's and children's bureau he will establish if granted the funds. Further, one additional employee is needed at each of the Oklahoma City, Muskogee and Tulsa employment offices, as well as an additional appropriation for rental purposes for the employment bureaus. The total rental cost of the five bureaus now, he said, is \$1,500 a year.

Under the terse heading, "The Remedy," Mr. Connally stated his views of the proper administration of the department of labor. "There are two ways to administer the labor protective laws of the state," he wrote to the governor. "First, to continue the present policy of trying to administer those laws with an inadequate field force, which necessitates a large number of prosecutions. Or, second, to have the legislature provide additional assistance for our field force, sufficient to obtain frequent contact with conditions, which would encourage employers in the observance of the laws, and do away with undesirable notoriety incident to court procedure."

## GROUND IN WEST OF STATE IS DRY TO GREAT DEPTH

(By the Associated Press)  
OKLAHOMA CITY, Aug. 16.—Depths to which the ground has dried out in various parts of the state on account of the long drought reports on which were recently made to H. H. Schutz, federal crop statistician for Oklahoma, show a serious lack of moisture for all crops, according to Mr. Schutz.

In the western part of the state the ground is entirely dry to a depth of five to six feet at the following points the reports show: Binger, Clinton, Elgin, Frederick and Elk City.

At Norman, near the central part of the state, the soil is dry at from two and one-half to five and one-half feet, depending on whether the test was made on high or low ground.

At Konawa moisture showed at ten inches, at Ada, at ten inches, at Wapanucka at eighteen inches, and at Okemah, at fourteen inches. The ground was dry to twenty inches at Tulsa. Between Bigheart and Pawhuska the ground was dry to a depth of eighteen inches and between Wagoner and Coffeyville, Kas. uplands showed moisture at 24 inches and lowlands at 12 inches.

Oklahoma is the first state in which an attempt to tabulate all-year around figures on soil moisture has been made, according to Mr. Schutz. He is collecting his information through reports made by the Southwestern Bell Telephone company. Line workmen of the company digging post holes report to their foremen the depths at which they strike moist soil.

Lingue is a native Chilean wood used in the manufacture of shoe heels.

## Farmers' Column

By Byron Norrell

Peeling peaches is about the biggest part in the canning process when it is done with a knife and usually this means considerable waste. A government bulletin recommends the use of lye in removing the peeling and Mmes. J. B. Hill and C. O. Barton of Ada who have tried it pronounce it a success. An iron kettle, or a galvanized one should be used, since lye is injurious to aluminum. A 10 cent can of lye and half an ounce of alum should be dissolved in 9 gallons of water. The mixture should be brought to a boil and the fruit which is placed either in a wire basket or cheese clothing sack placed in it for two minutes. It should be thoroughly washed twice in cold water and on the second washing whatever peeling remains should be rubbed off. If not more than a bushel of fruit is to be peeled the solution can be made thus: 1 gallon water, 4 table spoonsful lye and a pinch of alum. Mrs. Hill states that this method does not work very well with fully ripe freestone peaches for the reason that some of the lye is likely to work in next to the seed and remain. To guard against accidents the vessel in which the solution is boiled should not be more than two-thirds full. When the dipping begins it may be kept up until the solution turns dark. When this occurs it is a sign that it has lost most of its strength.

The hog exhibits at the township and county fairs this fall will be in strong contrast with those shown at the first fairs held in the county. When Agent Hill began work here some six or seven years ago there were only five or six herds of registered hogs in the county. Now dozens of farms have registered stuff of various breeds and others are going the registered route all the time.

Recent tests at the Kansas experiment station indicate that while alfalfa is first class hog pasture, sudan grass is almost as good, and even better during the dry months of July and August. Sudan thrives in dry weather when alfalfa can do little. Sudan has gained considerable popularity with some of the farmers in Pontotoc county.

There is no doubt about quails eating boll weevils. This fact has long been known and it entitles the bob white to a greater degree of protection this winter than ever before. Anything that destroys weevils earns a right to live.

The Farmer-Stockman recently offered prizes for the best letters answering the question, "Do you want your daughter to marry a farmer?" Some interesting letters on both sides have been written and

the fourth prize was awarded to Mrs. Opau Hampton of Pontotoc county and is reproduced below. As I see it the whole thing is just a matter of who the farmer is. I have seen lots of men in every walk of life that I would seriously object to a daughter of mine marrying. It is not a matter of occupation but the man himself who counts. While farm life has its objections it also has its compensations; it depends on how a couple manages. Here is Mrs. Hampton's letter:

"The kind of a boy I want my daughter to marry would be a progressive farmer, with as good an education as possible; one who has finished his education in some good agricultural college, who knows good farming, stock raising, poultrying, dairying, hog raising and last

but not least, he must be one who loves a good, modern home, with things handy for his wife and who loves to see her go to town with a little check all her own. Of course, daughter must have a good education to make an even match, for with one to have an education and not the other would be like harnessing up a big, fat horse and a little, poor one. One would have to pull most of the load.

"Yes, give us more good, progressive farm boys. And the way to get them is to have more good consolidated schools and high grade schools that will teach our boys and girls agriculture and domestic science. Mine for the farm, with its never-ending beauty, plenty of pure-bred livestock and some good way to get to market, school and church!"
